It might be interesting for you to know that from the seed which I bought from you last year, I received the most gorgeous display of pansies that I have ever seen in my life, and that means much, as I have grown them in Germany, France and England and here in the United States for the last twenty-five years. The plants average now at this date (June 21) a foot in diameter and thirty to forty flowers per plant. The size of the flowers and stems is extraordinarily large, and the color is simply superb.

ADOLPH JEANICKE.

Fruitville, Cal.

No doubt you will be pleased to hear that I received the first prize at the spring show in San Francisco in the professional class with your pansy blooms of the Kenilworth strain. Some measured three inches in diameter, and the rest running very near in size, and such a lovely combination of colors. They are without doubt the best I have ever grown, and I have no trouble in selling the plants. I thought it my duty to write and tell you of my appreciation.

WALTER L. BATES.

Scranton, Pa.

The pansy seed I bought from you last season were planted in test by the side of other strains from leading seedmen. It was pleasing to see customers gather at the Kenilworth bed first. They were half gone before the others hardly commenced to sell. If your seed proves as superior this season as it did last I will drop all others.

F. W. MACKEY.

HE KENILWORTH GIANT PANSEY SEEDS are grown by myself. I take great care to improve the stock constantly. Every year I try all the novelties of known merit and those that prove extra good are added to my list. It is a well known fact that American carefully grown Pansy Seed will produce larger flowers than European seed.

In sending you my list of Pansy Seed, I take the opportunity to thank you for your patronage and constantly increasing trade. I shall strive to merit its continuance by furnishing, as in the past, only the very best seeds. To those who have not tested my seeds I wish to say that the seeds I offer are of my own growing. All my seeds are tested by myself before putting up. I solicit a trial order and am confident that it will be to your advantage as well as mine. I know that my seeds will give much satisfaction, and will result in my receiving your regular orders in the future.

**NON-WARRANTY**— Most of the failures with seeds are due to causes entirely beyond our control, such as unfavorable weather and soil conditions, too deep or too shallow planting, etc., which renders it impossible for us to guarantee success, and although we take all possible care to supply only such seeds as will, under proper conditions, produce satisfactory results, we still give no warranty as to description, quality of any of the seeds sent out, and will not be in any way responsible for the crop, and every order will be executed on these conditions only. It must, however, be plain to everyone who gives the matter the slightest thought that it is to our best interests to send out only such seeds as will not only grow, but prove true to name and description.

I do a strictly **Cash With Order** business, regardless of the responsibility of the customer. Remittances must accompany all orders, and may be made by P. O. Orders, Express Orders or Draft. If you must send stamps, send 1c. stamps.

**SIGN YOUR NAME, POSTOFFICE, COUNTY AND STATE PLAINLY.**

## New Early Flowering or Winter Blooming Giant Pansies

An entirely new and distinct strain of pansies. The main advantage of these new pansies over all hitherto existing pansies is the extreme earliness of flowering and its unusual hardiness, which enables them to withstand quite severe winters, and to bloom right on into the summer. Sown at the same time as other pansies, they begin flowering the early part of March or as soon as the snow is off the ground, many times having four or five large flowers to a plant, when all other pansies are only showing buds. The flowers are large, well formed and fragrant. They are highly recommended for autumn planting on graves, and for very early bedding, as well as for early cut flowers.

14. **WINTER SUN.** Golden yellow with dark eye.
15. **ICE KING.** Silvery white with dark blue eye.
16. **CELESTIAL QUEEN.** Light or sky blue.
17. **CHARM OF MARCH.** Dark velvety blue.
18. **MIXED.** The above four colors with other shades and variations.

500 Seeds, 25c; 1000 Seeds, 40c;  $\frac{1}{8}$  oz., \$1.10;  
 $\frac{1}{4}$  oz., \$2.00; 1 oz., \$7.50.
